

I need a pediatric nurse in my corner.

If you become a nurse in a school, primary care office, clinic, or hospital, I'll be there too.

You can be my advocate. You can provide nursing care that's sensitive to what I'm going through.

Risky behavior. Being bullied. Rocky times at home. And just being a normal teen. Ask me the tough questions when we talk and make a difference for my today... and my future.

Be my lifeline.

Be a pediatric nurse.
